

GOGO TEXT & TALK

Your smartphone now has wings.

Global. Affordable. Proven.

Gogo Text & Talk lets you use your own smartphone

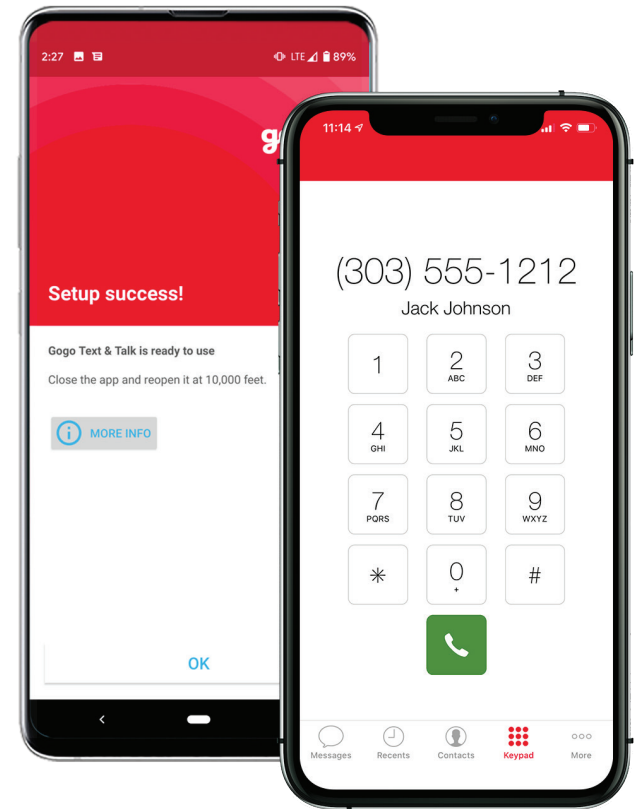

to call and text in the air, just like you do on the ground. The best part is that because it uses your own number, there's no need for two-step dialing routines, call forwarding protocols or pre-programmed extensions.

Patent-pending technology allows Gogo Text & Talk to work through a Gogo Biz connection with Wi-Fi without the need for expensive and heavy picocell technology.

If you're flying and someone dials your number – it rings. Same with texting – it just works. Your address book and caller ID? It all works too.

About Gogo Text & Talk

- › Your own phone, your own number.
- › Very easy to use – looks like your phone, works like your phone.
- › Available with any Gogo Biz® system.
- › Gogo Text & Talk is 100% software based, so if you already have
- › Gogo Biz equipment installed on your aircraft, no additional hardware is required. Simply add a Gogo Biz voice service plan to your Gogo Biz data plan.

Three simple steps

1. Activate

Activate the Gogo Text & Talk service at the aircraft level, by purchasing a dealer-installed software key. (If a customer forgets to ground register prior to flight, they can still make a call from the aircraft.)

2. Drop

Drop the Gogo Text & Talk app on your smartphone and perform a one-time registration.

3. Climb aboard

Climb aboard, activate Airplane Mode, connect to Wi-Fi, then launch the app and enjoy.

Compatible networks

- › Gogo Biz

Requirements

- › Gogo Biz data and voice service

Availability

- › Works with most major ground wireless carriers including AT&T, Verizon, Sprint, and T-Mobile;
- › Works with iPhone and Android devices the latest version updates.
