

# Gogo AVANCE L3

## Productive, flexible, affordable Gogo Biz connectivity

Gogo AVANCE L3 taps into the proven Gogo Biz network, and lets you stay seamlessly connected to your professional and personal life during flight. No matter your aircraft size, you can now give everyone on board powerful inflight internet and entertainment that works everywhere you go. All from a single, affordable, lightweight, customizable solution.

### FEATURES

#### Reliable, high-performance Gogo Biz inflight internet

- Enables email, web browsing, corporate VPN access, texting, and voice calls\*
- Seamless coverage in the continental U.S., plus portions of Canada and Alaska
- Three service levels to choose from, depending on connectivity needs and device requirements

#### Smart router optimizes the in-cabin experience

- Advanced 802.11ac dual-band router (5GHz & 2.4GHz) maximizes bandwidth and optimizes in-cabin Wi-Fi performance
- Dynamic, multi-bearer data and voice management

#### Terrestrial modem

- Complimentary internet on the ground in 100+ countries

#### PBX auto attendant manages and personalizes voice calls

- Manages and routes calls over Iridium, Inmarsat and Gogo Biz/Gogo Biz 4G
- Auto attendant can be enabled to greet people calling the aircraft, and allows caller to ring cockpit, the cabin or all phones

#### Gogo Vision inflight maps, entertainment and information

- FlightPath3D Moving Map
- Destination weather (coming soon)
- News clips
- eMagazine (subscription required)
- Unlimited licensed movies (subscription required)
- Unlimited TV episodes (subscription required)
- Multi-language audio tracks and user interface selection
- Automatic content updates available at any Gogo Cloud global FBO location or via Gogo Cloudport
- One touch access to select Cabin Management System (CMS) services (contact Gogo for information)

#### Gogo Text & Talk for personal smartphone use

- Use your personal smartphone to call and text in the air; works with your own phone number

#### Award-winning service and support

- 24/7/365 monitoring and global support
- Remote service activations
- Gogo DASH tools provide visibility into the health of Gogo systems

Platinum Voice	360	\$539.95	\$1.35
Corporate Voice	1,000	\$999.95	\$1.30

\* AVANCE L3 Core supports email, voice and internet browsing capabilities limited to websites that are light on content: such as minimal imagery and graphics, and no embedded video. On average, customers with Core configurations connect 4 devices per flight and use 30% less data than Plus and Max configurations.

\*\* If streaming is required, consider the Gogo AVANCE L5 system, which connects to the Gogo Biz 4G network.

\*\*\* Hourly rate includes both voice and data service. No additional discounts apply. If you're considering an hourly plan for connectivity service, please be aware that any device connecting to the internet via the cabin Wi-Fi network triggers the \$99 hourly charge, even if minimal data is passed. This may result in data charges when using Gogo Vision. The only way to help prevent these internet connections is to ask your dealer to install all bearer Enable/Disable discretes during system installation.

\*\*\*\* Exclusions and limitations apply. Contact Gogo Business Aviation Sales for details. Terms: 12-month term; price is per aircraft; prepay required; overages are billed monthly per aircraft; rollover of unused MBs is allowed from month-to-month but expire at end of the agreement term; may purchase additional buckets at any time.
